DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a protein fraction.

Group II, claim(s) 9-11, drawn to a method for hydrolyzing or transphosphatidylating phospholipids.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

A "special technical feature" is defined by PCT Rule 13.2 as "those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art." In the instant case, as discussed below, a number of the claimed inventions fail to make any contribution over the prior art. Because a number of the claimed inventions fail to make any contribution over the prior art, the claims as filed fail to contain a single common special technical feature supporting a showing unity of invention.

Specifically, as demonstrated by Bezakova et al. (Chem. Phys. Lipids, (September, 2000) Vol. 107, No. 1, pp. 22. 41st International Conference on the Biochemistry of Lipids. Halle, Germany. September 13-16, 2000), cited in the International Search report for PCT/EP03/09625, which is part of the record for the instant application) discloses a protein fraction from the claimed plant source having two subfractions of which one has hydrolytic activity and is activate by Zn ions. Because this claimed embodiments fail to make a contribution over the prior art, it is clear that all claims as filed fail to provide a special technical feature common to all claimed inventions. Because the claims as filed lack a common special technical feature, the claims lack unity.

Lack of a common special technical feature, and therefore lack of unity, is further demonstrated by the fact that the various products claimed, compounds having a multitude of possible substituents combinations, all have vastly different properties. Moreover, because the various processes recited in the claims recite different process steps, it is clear that the process claim also lack a single common special technical feature, and therefore also lack unity.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susan Hanley whose telephone number is 571-272-2508. The examiner can normally be reached on M-F 9:00-5:30.
